

Microbiology Capabilities

Background

McCoy & McCoy Laboratories, Inc has been providing microbiology testing since the inception of the Clean Water Act. Since then our capabilities have grown to include micro testing on **cosmetics, agricultural, and tobacco products**. Our Microbiology Section is part of our integrated multi-disciplinary approach to analytical laboratory services. Our stringent adherence to GLP protocols, National Environmental Laboratories Accreditation Committee, AOAC methods, U.S. Pharmacopoeia methods, Standard Methods for the Examination of Water and Wastewater, along with accreditations on specific testing methods ensures the highest level of quality commitment.

Routine Analysis

McCoy & McCoy Laboratories, Inc. routinely analyze for the detection and enumeration of indicator organisms and pathogens

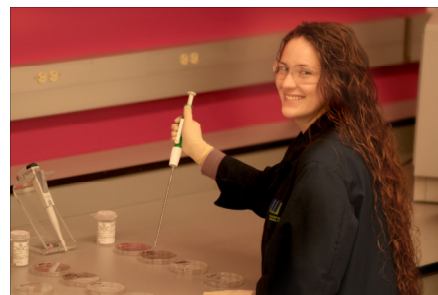

- **Aerobic Colony Count (ACC)**
