

# TECH NOTES

## Microbiology

As one of the leading microbiological laboratories, in the southeast, McCoy & McCoy Laboratories, Inc. (MMLI) utilizes the latest advancements in automated and rapid microbiological technology. Our laboratory provides our clients with exceptional turnaround times and accurate results, all while offering individual attention throughout the testing and reporting process. Our highly-skilled team of microbiology professionals have undergone GMP training, are certified by the Commonwealth of Kentucky Division of Water, and are trained to focus on attention to detail from sample receipt to the time your results are reported. MMLI also participates and maintains good standing with A2LA-accredited proficiency programs. Listed below are some of MMLI's most popular services.
